

Riley MacDonald

647-289-6124 me@rileym.dev 6210 Chemin Deacon, Montreal, QC

Profile

Detail-oriented professional with 4+ years of experience and a proven knowledge of frontend architecture, scalable systems, and RESTful services. Aiming to leverage my skills successfully to fill the Software Developer role at your company.

Experience

SOFTWARE DEVELOPER, LAUNCHCODE, CALGARY, AB – 2016 - PRESENT

Worked in both teams and alone to create beautiful web, IOS and Android applications using Agile development concepts. Communicated with clients and logged incoming requests. Worked with designers to deliver exceptional UIs and a seamless UX. Developed custom software solutions for a variety of industries using the latest technologies and practices. Mentored Junior developers, and helped develop internal tools to maximize efficiency. Partook in a peer code-review process. Managed deployments and releases as well as the QA process.

AM DEVELOPMENT, REMOTE, CONTRACT – 2016-2017

Brought on by one of my ex-classmates to help with a react contract. Created a mobile app in React Native for an e-commerce application that was solely web based. Utilized an existing REST api.

FREELANCE – 2016-PRESENT

Started out developing websites/tools for friends and family as a way to earn income on the side. Transitioned into larger scale projects with ex-classmates after attending RED and developed a few apps that unfortunately didn't take off. Learned a lot about development and got to experiment with a variety of new technologies.

Education

RED Academy – App Development, 2016

RED Academy – Web Development, 2016
